To,

National Institute of Secondary Steel Technology,
Mandi Gobindgarh

Sub : Services of NISST for Secondary Steel Sector

Dear Sir,

We are pleased to note that NISST had been working very hard since last three decades for the benefit of the secondary steel sector. The excellent services provided by NISST in the fields of Training of our man power, Energy audits, quality, Safety, Testing of steel etc. helped our member units in improving our productivity and reduction in energy (electrical & thermal) per ton of steel.

It is worthwhile to mention here that the Institute has helped the industry to overcome the different problems related to high power and fuel consumption. The commendable work undertaken by NISST in the field of energy efficiency has helped the industry to minimize the energy consumption per ton of steel.

With setting up of NABL accredited Testing Laboratories and recognition from BIS for fifteen steel related products at NISST Mandi Gobindgarh, we are able to produce certified quality products to meet the quality orders issued by the Government of India.

We are thankful to the entire team of NISST, for helping us to improve our operations especially in reduction of our specific energy consumption which is a National saving as well. It is requested to further strengthen NISST for covering more industrial units for the benefits of industry and our nation.

Thanking you,

(Vinod Vashisht)
President
